

Feel Like Yourself Again

Energy, Hormones & Weight

Something changed. You used to have more energy, more focus, more drive. Now it takes everything you have just to get through the day. You're not imagining it — and you don't have to accept it.

IS THIS YOU?

- You're tired even after a full night of sleep.
- Your brain feels foggy or scattered.
- Weight seems to stick no matter what you try.
- Your mood has shifted and you're not sure why.
- Your motivation or drive isn't what it used to be.
- You've tried supplements or diets and nothing lasted.

HOW THIS PATH WORKS

- 1. Range Assessment.** We sit down and talk through your symptoms and goals. No rush. No judgment.
- 2. Deeper labs.** Blood work that looks at hormones, nutrients, metabolism, and other markers so we can see what's really going on.
- 3. Review together.** Your provider explains your results in simple language and answers every question.
- 4. Start your program.** You decide together on a plan that fits your body and your life.

COMMON PROGRAM TYPES

Hormone Optimization

Steady support for energy, mood, and drive when your levels are off.

Medical Weight Loss

Medication, labs, and guidance to help your body respond to weight loss again.

Peptide Therapy

Targeted support for energy, sleep, and recovery.

Your provider recommends what fits you. These are tools — not a menu.

WHAT TO EXPECT

- Most people start noticing changes over several weeks, not overnight.
- We check in with you regularly and adjust as your body responds.
- You always have a chance to ask questions and change course.
- You're never locked into something that isn't working.

Talk with your provider or the front desk about starting the Energy, Hormones & Weight path with a Range Assessment.
