Hormone Optimization

Your hormones control energy, mood, weight, sleep, and drive. When they're off, everything feels harder. We find out what's going on and fix it.

SIGNS YOUR HORMONES MIGHT BE OFF

Men

- Low energy or constant fatigue
- Trouble building muscle despite training
- Weight gain, especially belly fat
- Brain fog or poor focus
- Low sex drive or performance issues
- Irritability or mood swings

Women

- Exhaustion that sleep doesn't fix
- Stubborn weight that won't budge
- Mood swings, anxiety, or depression
- Brain fog or memory issues
- Low libido
- Hot flashes or night sweats

HOW IT WORKS

1. **Get your labs.** Start with a baseline panel. We test hormones, thyroid, and metabolic markers. Results in 3–5 days.
2. **Meet your provider.** We review results together, explain what's happening, and build a treatment plan for you.
3. **Start treatment.** Begin hormone therapy. We monitor progress and adjust. Most people feel better in 4–8 weeks.

HRT MEMBERSHIP

ALL-INCLUSIVE

HRT Monthly Membership

$250
per month

- All hormone medications
- Testosterone, estrogen, progesterone
- All supplies and syringes
- Quarterly lab monitoring
- Direct messaging with provider
- **Bonus:** 1 Range IV/month ($225 value)

Baseline Lab Panel

Required before starting HRT. Comprehensive hormone, thyroid, and metabolic testing with provider assessment.

ESSENTIAL	ELITE
$350	$750

WHAT WE CHECK THAT OTHERS MISS

→ Free testosterone — not just total

→ Thyroid antibodies and full thyroid panel

→ Estrogen metabolites

→ Optimal ranges — not just "normal"

Medical Weight Loss

GLP-1 medications target the hormones that control hunger, satiety, and metabolism — helping your body naturally want less food while improving how you process what you eat.

15–25%
Average body weight loss over 6–12 months

1–2 lbs
Typical weekly loss at therapeutic dose

SOUND FAMILIAR?

- Tried every diet with no lasting results
- Always hungry, even after eating
- Yo-yo weight gain and loss
- Cravings that control your choices
- Metabolism feels like it's stalled
- Ready for real medical support

HOW GLP-1 MEDICATIONS HELP

1. **Reduced Appetite**
   Works on the brain's hunger centers to naturally reduce appetite and cravings
2. **Steady, Sustainable Weight Loss**
   Gradual fat loss — 1–2 lbs/week consistently over months, not crash dieting
3. **Metabolic Improvement**
   Improves blood sugar, insulin sensitivity, and cholesterol alongside weight loss
4. **Quiets the Food Noise**
   The constant mental chatter about food goes away — healthy choices become easier

WEIGHT LOSS PROGRAM

ALL-INCLUSIVE

Weight Loss Monthly Program

$399
starting at / per month

- Medication included
- All supplies and syringes
- Monthly provider check-ins
- Dose adjustments as needed
- Direct messaging with provider
- Nutrition guidance

Baseline Lab Panel

Required before starting. We check metabolic markers, thyroid, hormones, and factors that affect weight.

ESSENTIAL	ELITE
$350	$750

WHAT TO EXPECT

Week 1–2	Week 3–4	Month 2–3	Month 4–6	Month 6–12
Start low dose. Body adjusts. Appetite begins to reduce.	Dose increases. Appetite suppression kicks in. Scale starts moving.	Optimal dose dialed in. Consistent 1–2 lb/week loss.	In a rhythm. Clothes fit differently. Labs improving.	Approaching goal weight. Discuss maintenance plan.

Peptide Therapy

Peptides are short chains of amino acids that signal your body to perform specific functions. Unlike medications that force a response, peptides work with your body's natural systems. All protocols are prescribed and monitored by a licensed provider.

PEPTIDE PROTOCOLS WE OFFER

Recovery & Healing
Support tissue repair, reduce inflammation, and support natural healing following injury or surgery.

Growth Hormone Support
LABS REQUIRED

GH-releasing peptides that may support sleep quality, recovery, and body composition.

Immune Support
Peptides studied for their role in supporting immune function and natural defense mechanisms.

Sexual Wellness
Protocols that work with your nervous system to support arousal and function in men and women.

Mitochondrial & Cellular Health
Support cellular energy production, metabolic function, and healthy aging at the cellular level.

Gut Health
Peptides studied for protective effects on the GI tract and their role in supporting mucosal integrity.

GETTING STARTED

1. **Range Assessment.** Meet with your provider to discuss your health history and goals.
2. **Protocol design.** Your provider selects the appropriate peptides, dosing, and duration.
3. **Injection training.** We teach you subcutaneous injection technique in the clinic.
4. **Monitoring.** Regular check-ins to assess your response and adjust as needed.

Good to Know

- All peptides require a prescription
- Pre-filled syringes for easy self-administration
- Some protocols require baseline lab work
- Can be combined with HRT, IV therapy, and HBOT
- Pricing discussed at your assessment

Common Reasons Patients Ask About Peptides

- Injury or post-surgical healing
- Poor sleep quality
- Low energy or fatigue
- Slow recovery from exercise
- Chronic inflammation
- GI or digestive concerns

BPC-157 + Thymosin Beta-4

Recovery peptide therapy — two peptides that work together to support healing from multiple angles.

BPC-157: 500 mcg · Thymosin Beta-4: 500 mcg · Pre-filled single-use syringes · One injection per day

HOW IT WORKS

BPC-157

Body Protection Compound — naturally found in the stomach

- Supports tendon, ligament, and muscle repair
- Improves blood flow to injured tissue
- May accelerate wound healing

Thymosin Beta-4

Naturally occurring peptide involved in tissue regeneration

- Promotes new blood vessel growth
- Supports cell migration and repair
- Reduces inflammation

Why Together?

BPC-157 focuses on direct tissue repair while Thymosin Beta-4 improves blood flow and reduces inflammation. One speeds healing, the other creates the environment for it.

WHAT TO EXPECT

Days 1–10 Reduced swelling and inflammation. Improved mobility. Many notice less pain during daily activities.

Days 10–30 Deeper healing. Continued tissue repair. Consistency compounds — the longer you stay on protocol, the more benefit you build.

PROTOCOLS & PRICING

10-Day Protocol Starter protocol for recent injuries, flare-ups, or first-time users	**$250**
20-Day Protocol Extended healing for moderate injuries — builds on initial progress	**$450**
30-Day Protocol Advanced protocol for chronic issues, post-surgery, or athletes in training	**$675**

Pre-filled, single-use syringes delivered to your door. We do your first injection together at the clinic.

Extended protocols available up to 12 weeks. Ask your provider about longer protocols for chronic conditions, complex injuries, or ongoing recovery support.

BEST FOR

→ Tendon, ligament, and muscle injuries

→ Post-surgery recovery support

→ Chronic pain or slow-healing injuries

→ Athletes who want to recover faster between training

RANGE MEDICAL
1901 Westcliff Dr, Suite 10 · Newport Beach, CA · (949) 997-3988

IV Therapy — The Range IV

Skip the gut. Feed your cells directly. 100% bioavailability — your body absorbs everything we put in.

OUR SIGNATURE IV

The Range IV

Build your own — customized to your needs

$225
per session

Choose 5 vitamins and minerals tailored to your symptoms and goals. Our nurses review your needs before every infusion to build the right blend for you.

5	+$35	45–90
Vitamins & minerals included	Each additional add-on	Minutes per session

AVAILABLE VITAMINS & MINERALS

Vitamin C Immune support, antioxidant	**B-Complex** Energy, metabolism	**B12** Energy, mood, nerves
Magnesium Muscle, sleep, recovery	**Zinc** Immune, skin, healing	**Glutathione** Antioxidant, detox
Amino Acids Muscle, recovery	**L-Carnitine** Fat metabolism, energy	**NAC** Liver support, antioxidant
Calcium Bone, muscle, nerve	**Biotin** Hair, skin, nails	**Vitamin D3** Immune, mood, bone

Want more than 5? Add on for $35 each.
Your nurse will help you decide what to include based on your symptoms, goals, and how you're feeling that day.

WHO IT'S FOR

- Low energy or fatigue
- Frequent colds or illness
- Slow recovery from workouts
- Dehydration
- Jet lag or travel recovery
- Hangover recovery
- Athletic performance
- General wellness & maintenance

WHY IV INSTEAD OF ORAL?

1. **100% Absorption**
   Oral vitamins lose 20–80% to digestion. IV delivers everything directly to your bloodstream.
2. **Rapid Results**
   Feel the effects within hours, not days. Immediate hydration and nutrient delivery.
3. **Higher Therapeutic Doses**
   IV allows doses that aren't possible orally — like high-dose Vitamin C at 50–70x higher blood levels.
4. **Customized to You**
   Not a one-size-fits-all drip. Every Range IV is tailored to your symptoms and goals.

Walk-Ins Welcome
Established patients can walk in any time we're open. New patients — call or text to book a quick screening and get started the same day.

Vitamin & Nutrient Injections

Fast. No IV needed. In and out in 5 minutes. Great for targeted support or maintenance between IVs.

Standard Injections — $35

B12 (Methylcobalamin) Energy, mood, nerve health	**$35**
B-Complex Energy, metabolism, brain function	**$35**
Vitamin D3 Immune support, bone health, mood	**$35**
Biotin Hair, skin, nails	**$35**
Amino Blend Energy, muscle support	**$35**
NAC Antioxidant, liver support	**$35**
BCAA Muscle recovery, energy	**$35**

Premium Injections — $50

L-Carnitine Fat metabolism, energy	**$50**
Glutathione (200mg) Antioxidant, skin brightening, detox	**$50**
MIC-B12 (Skinny Shot) Fat metabolism, liver support, energy	**$50**

NAD+ Injections — $0.50/mg

50mg Quick boost	**$25**
75mg	**$37.50**
100mg Standard dose	**$50**
125mg	**$62.50**
150mg Higher dose	**$75**

Why Injections?

- 100% absorption — bypasses digestion entirely
- Fast — in and out in under 5 minutes
- Targeted — get exactly what your body needs
- Great between IVs for ongoing support

Who It's For

- Low energy or fatigue
- Weight loss support
- Athletic recovery
- Immune support
- Hair, skin & nail health
- Anti-aging & cellular health

SAVE MORE

Packages Available

Buy multiple injections at once and save. Ask your provider about package pricing for any of our injections — great for weekly or bi-weekly protocols.

Walk-Ins Welcome

No appointment needed for established patients. New patients — start with a Range Assessment or call us to get started.

NAD+ Therapy

NAD+ is a coenzyme in every cell of your body — essential for energy production, DNA repair, and healthy aging. Levels decline significantly with age. We restore them.

50%
NAD+ decline by age 50

100%
Bioavailability with IV delivery

2
Proven cell uptake pathways

WHAT NAD+ DOES FOR YOUR BODY

1. **Cellular Energy**
   Converts food into ATP — your cells' energy currency
2. **DNA Repair**
   Activates PARP enzymes that repair damaged DNA
3. **Brain Function**
   Supports neuronal health and mental clarity
4. **Healthy Aging**
   Activates sirtuins — proteins that regulate aging
5. **Metabolic Health**
   Supports glucose metabolism and lipid balance
6. **Recovery**
   Accelerates cellular repair and reduces inflammation

SIGNS YOUR NAD+ MAY BE DEPLETED

- Low energy or chronic fatigue
- Brain fog or poor focus
- Slow recovery from exercise
- Cognitive decline or memory issues
- Aging concerns or longevity goals
- Athletic performance optimization

NAD+ IV INFUSIONS

225mg IV Great starting point	**$375**
500mg IV Full cellular benefit	**$525**
750mg IV High-dose protocol	**$650**
1000mg IV Maximum dose	**$775**

NAD+ Injections — Quick, 5 Minutes

Subcutaneous · Priced at $0.50/mg · Great for maintenance between IVs

50mg	100mg	150mg
$25	$50	$75

RECOMMENDED PROTOCOLS

Injection Protocol

12 weeks · 3x per week

Self-administered at home. Convenient, consistent, and effective for building NAD+ levels over time.

IV Protocol

Quarterly · 5 IVs in 10 days + monthly maintenance

Front-loaded IV infusions for rapid restoration. Repeat the front-load quarterly for sustained results.

RANGE MEDICAL

Cortisone Injection + Consult

Targeted relief for joint pain and inflammation. Includes provider evaluation and same-day treatment.

INCLUDES CONSULTATION

HOW IT WORKS

1. **Consult with your provider.**
   We evaluate the affected area, review your history, and determine if a cortisone injection is right for you.
2. **Same-day injection.**
   If appropriate, we administer the cortisone injection during your visit. Quick, precise, and guided by your provider.
3. **Recovery guidance.**
   We walk you through what to expect post-injection — rest, activity, and when to follow up if needed.

COMMON INJECTION SITES

- **Shoulder** — rotator cuff, bursitis
- **Knee** — arthritis, meniscus inflammation
- **Elbow** — tennis elbow, golfer's elbow
- **Wrist & hand** — carpal tunnel, trigger finger
- **Hip** — bursitis, joint inflammation
- **Foot & ankle** — plantar fasciitis, Achilles tendon

WHAT TO EXPECT

- The injection takes under a minute
- Relief typically within 24–72 hours
- Effects last 4–12 weeks
- Return to normal activity right away

Cortisone

Injection + Consult

$250

- Provider evaluation
- Same-day injection
- Post-treatment guidance
- No referral required

WHO IT'S FOR

- Joint pain or stiffness
- Tendonitis or bursitis
- Inflammation not responding to rest
- Acute flare-ups (shoulder, knee, elbow)
- Sports injuries causing swelling
- Chronic arthritis pain

Walk-Ins Welcome

No appointment needed for established patients. New patients — start with a Range Assessment or call us to get started.

Six-Week Cellular Energy Reset

Our most powerful option for energy, recovery, and performance.

$3,999

WHAT'S INCLUDED

- **18 Hyperbaric Oxygen Sessions**
  60 minutes each at 2.0 ATA
- **18 Red Light Therapy Sessions**
  660–850nm full-body treatment
- **Structured 6-Week Schedule**
  3 sessions per week with a clear plan
- **Weekly Automated Check-Ins**
  Track your progress throughout the program

"This is our most powerful option. If you tried to piece this together with individual packs, you'd be over four thousand dollars anyway — without the structure."

Money-Back Guarantee

Complete the full 6-week protocol as prescribed. If you don't experience measurable improvement, we'll refund your investment.

BEST FOR

- → Fastest, most aggressive change in energy
- → Accelerated recovery from workouts or injuries
- → Peak performance over a focused 6-week window
- → Chronic fatigue or brain fog that won't go away
- → You want a structured protocol, not guesswork

HOW IT WORKS

01 Book your first session and we build your 6-week calendar

02 3 combo sessions per week — Red Light + Hyperbaric

03 Weekly check-ins track your energy, sleep, and recovery

04 After 6 weeks, review results and next steps

Hyperbaric + Red Light Combo Membership

Pair both therapies into one membership for the best value. Each visit includes one Hyperbaric Oxygen session and one Red Light Therapy session back to back.

CHOOSE YOUR FREQUENCY

1x Per Week
4 Hyperbaric + 4 Red Light sessions/month
$899 per month

MOST POPULAR

2x Per Week
8 Hyperbaric + 8 Red Light sessions/month
$1,499 per month

3x Per Week
12 Hyperbaric + 12 Red Light sessions/month
$1,999 per month

3-month minimum commitment · Then month-to-month

How It Compares

Buying singles (HBOT $185 + RLT $85)	**$270/session**
1x/week combo membership	**$225/session**
2x/week combo membership	**$187/session**
3x/week combo membership	**$167/session**

EACH SESSION INCLUDES

Hyperbaric Oxygen
60 minutes at 2.0 ATA. Pressurized oxygen supports healing, reduces inflammation, and boosts cellular energy.

Red Light Therapy
Full-body red and near-infrared light (660–850nm). Supports recovery, reduces pain, and promotes cellular repair.

Who This Is For

- Injury recovery or post-surgery healing
- Chronic inflammation or pain
- Athletic performance and recovery
- Energy and general wellness
- Patients continuing after the 6-Week Reset

Already Considering the 6-Week Reset?

The Cellular Energy Reset ($3,999) is our most structured program — 18 HBOT + 18 Red Light sessions over 6 weeks with weekly check-ins and a money-back guarantee. This combo membership is ideal for patients who want ongoing access at their own pace, or who want to continue after completing the Reset.

Start with a Range Assessment

Your provider will help you choose the right frequency and determine if the combo membership or the 6-Week Reset is the better fit.

Hyperbaric Oxygen Therapy

Pressurized oxygen that supports healing, brain function, energy, and recovery.

SESSIONS & PACKS

Single Session
60-minute session at 2.0 ATA
$185

5-Session Pack
Save $75 — great way to get started
$850
$170 / session

10-Session Pack
Save $250 — best pack value
$1,600
$160 / session

"Perfect if you want to focus on healing, brain function, or recovery with Hyperbaric only."

ONGOING SUPPORT

Hyperbaric Recovery Membership

$549

per month · auto-billing

- → **4 Hyperbaric sessions** per month
- → Additional sessions just **$150 each** in the same month
- → **3-month minimum** , then month-to-month

"Best for patients who want steady, week-by-week Hyperbaric sessions without committing to the full 6-week Reset."

Red Light Therapy

Full-body light therapy that supports cell energy, recovery, skin health, and inflammation control.

SESSIONS & PACKS

Single Session 20-minute full-body treatment	**$85**
5-Session Pack Save $50 — great way to get started	**$375** $75 / session
10-Session Pack Save $250 — best pack value	**$600** $60 / session

"Great if you want to try Red Light or focus on one area like recovery, skin, or joint health."

BEST VALUE

Red Light Reset Membership

$399

per month · auto-billing

- → Up to **12 Red Light sessions** per month
- → Additional sessions just **$50 each** in the same month
- → **3-month minimum** , then month-to-month

"Best value if you plan to use Red Light regularly and want ongoing support instead of a one-time program."

Exosome Therapy

Cellular messengers that deliver regenerative instructions — telling your cells to repair, regenerate, and reduce inflammation.

30–150
Nanometers in size smaller than cells

30–60
Minutes for IV infusion

2–3
Months for full results to develop

What Are Exosomes?

Exosomes are tiny vesicles released by cells to communicate with other cells. They carry proteins, lipids, and genetic material that deliver instructions — telling recipient cells to repair, regenerate, or reduce inflammation. Think of them as packages of regenerative instructions. When delivered via IV, they circulate throughout your body, delivering repair signals to cells and tissues that need them.

WHY EXOSOMES

1. **Cellular Communication**
   Natural cell-to-cell messengers that signal repair
2. **Systemic Effects**
   IV delivery supports repair in multiple systems
3. **Anti-Inflammatory**
   Modulates chronic inflammation at the cellular level
4. **Tissue Regeneration**
   Stimulates resident stem cells and supports repair
5. **No Cell Transplantation**
   Delivers signals without transplanting cells
6. **Cutting-Edge Science**
   Rapidly expanding research and clinical evidence

WHO IT'S FOR

- Chronic inflammation
- Cognitive support
- Athletic recovery
- Tissue repair
- Anti-aging & longevity
- Autoimmune support
- Post-injury healing
- Longevity optimization

THE PROCESS

1. **Range Assessment.** Your provider discusses your goals, reviews your health history, and determines if exosome therapy is appropriate.
2. **Preparation.** On treatment day, we prepare the exosome solution from vetted suppliers under strict quality controls.
3. **IV infusion.** Exosomes are delivered through a standard IV over 30–60 minutes. Relax, read, or work during your session.
4. **Signaling begins.** Exosomes circulate and deliver regenerative signals to cells throughout your body.

WHAT TO EXPECT

Week 2–4
Some patients notice early improvements in energy and clarity.

Month 2–3
Full benefits emerge as cellular repair processes complete.

Ongoing
Some patients benefit from 2–3 treatments spaced weeks apart.

PRP Therapy

Platelet-Rich Plasma — your own blood, concentrated to heal. We amplify your body's natural repair response and inject it where you need it most.

3–5x
Platelet concentration vs. normal blood

30–60
Minutes for the entire procedure

4–6
Weeks to see initial improvement

What Is PRP?

PRP (Platelet-Rich Plasma) is plasma from your blood with a concentrated amount of platelets. Platelets contain growth factors that signal your body to repair damaged tissue. By concentrating these platelets to 3–5x normal levels and injecting them directly into an injured area, we amplify your body's natural healing response.

WHY PRP

1. **Uses Your Own Blood**
   No risk of allergic reaction or rejection
2. **Accelerates Healing**
   Concentrated growth factors amplify repair
3. **Reduces Inflammation**
   Creates a better environment for healing
4. **Minimally Invasive**
   Same-day procedure, typically under an hour
5. **No Downtime**
   Return to normal activities immediately
6. **May Avoid Surgery**
   Can postpone or eliminate surgical intervention

COMMON TREATMENT AREAS

- Knee pain & osteoarthritis
- Tennis & golfer's elbow
- Sports injuries
- Hair restoration
- Rotator cuff injuries
- Achilles tendon issues
- Chronic joint pain
- Facial rejuvenation

THE PROCESS

1. **Range Assessment.** Your provider evaluates your injury or concern and determines if PRP is the right approach.
2. **Blood draw.** We draw a small amount from your arm — just like routine lab work.
3. **Processing.** Blood is spun in a centrifuge to concentrate platelets to 3–5x normal levels.
4. **Injection.** Concentrated PRP is injected directly into the treatment area with ultrasound guidance if needed.

WHAT TO EXPECT

Week 1–2
Mild soreness at injection site. Normal activity resumes.

Week 4–6
Initial improvement in pain and mobility begins.

Month 3–6
Continued tissue regeneration. Full results develop over time.

Elite Blood Panel — Male

$750 · Includes a visit with your provider to review results

Our most complete blood test. The full picture of your health — hormones, heart health, inflammation, and vitamins. This panel finds problems that basic tests miss.

WHAT WE TEST

Basic Health

- → **CMP** — Liver, kidneys, and blood sugar
- → **Lipid Panel** — Cholesterol levels
- → **CBC** — Blood cells, anemia, infection

Hormones

- → **Testosterone (Free & Total)** — Energy, strength, and drive
- → **Estradiol** — Bone and brain health in men
- → **SHBG** — A protein that affects how your hormones work
- → **DHEA-S** — Adrenal hormone for energy and aging
- → **FSH & LH** — Brain signals that trigger hormone production
- → **IGF-1** — Marker for growth hormone levels
- → **Cortisol** — Your stress hormone
- → **PSA (Free & Total)** — Detailed prostate health check

Thyroid

- → **TSH** — Thyroid function
- → **T3 Free & T4 Free** — Energy and metabolism hormones
- → **TPO & Thyroglobulin Antibodies** — Autoimmune thyroid check

Metabolism

- → **Fasting Insulin** — How well your body uses sugar
- → **HgbA1c** — 3-month blood sugar average
- → **Uric Acid** — High levels cause gout and joint pain
- → **GGT** — Detailed liver health

Heart Health

- → **Apolipoprotein A-1** — The "good" cholesterol protein
- → **Apolipoprotein B** — The "bad" cholesterol protein (key heart risk marker)
- → **Lipoprotein(a)** — Genetic heart risk factor most doctors don't check
- → **Homocysteine** — High levels harm blood vessels

Inflammation

- → **CRP-HS** — Detects hidden inflammation
- → **Sed Rate** — Another inflammation marker

Vitamins & Minerals

- → **Vitamin D** — Bones, mood, and immune health
- → **Vitamin B-12** — Energy and brain function
- → **Folate** — Healthy cell production
- → **Magnesium** — Muscles, sleep, and heart rhythm
- → **Iron & TIBC** — Iron levels (too little or too much)
- → **Ferritin** — Iron storage

Who Is This For?

- ✓ Want the full picture of your health
- ✓ Have symptoms that haven't been explained
- ✓ Optimizing your health and performance
- ✓ Family history of heart disease or other conditions

What's Included

Your $750 covers the full lab panel plus a one-on-one visit with your provider to review every result, explain what it means, and discuss next steps.

MOST COMPLETE

Beyond the Essential Panel

The Elite adds heart health markers (ApoB, Lp(a)), inflammation testing, adrenal and growth hormones, detailed thyroid antibodies, and a full vitamin and mineral panel — the things that basic blood work misses.

Ready to Get Your Labs?

Start with a Range Assessment or call us directly to schedule your blood draw. Results in 3–5 business days.
