Your Lab Results Guide

Elite Blood Panel — Female

Everything you need to know about your lab panel — what we tested, why it matters, and what comes next.

Price: $750

Includes: Labs + Provider Review

BEYOND THE ESSENTIAL

Why the Elite Panel?

The Elite Panel includes everything in the Essential — plus advanced cardiac markers, inflammation markers, a deeper hormone profile, and a full vitamin and mineral panel. If you want the most complete picture of your health, this is it. We check markers most doctors never order — like Apolipoprotein B, Lipoprotein(a), homocysteine, and high-sensitivity CRP — because catching problems early is the whole point.

WHAT WE TEST

Your Elite Panel

The most comprehensive lab panel we offer — covering hormones, thyroid, metabolism, heart health, inflammation, and key vitamins and minerals.

🩸 Basic Health

- ✔ CMP (liver, kidneys, blood sugar)
- ✔ Lipid Panel (cholesterol, triglycerides)
- ✔ CBC (blood cells, anemia, infection)

🧬 Hormones

- ✔ Estradiol
- ✔ Progesterone
- ✔ Testosterone (Total & Free)
- ✔ SHBG
- ✔ FSH
- ✔ LH
- ✔ DHEA-S
- ✔ IGF-1
- ✔ Cortisol

🦋 Thyroid

- ✔ TSH
- ✔ T3 Free
- ✔ T4 Total
- ✔ T4 Free
- ✔ TPO Antibodies

- ✔ Thyroglobulin Antibodies

📊 Metabolism

- ✔ Fasting Insulin
- ✔ HgbA1c
- ✔ Uric Acid
- ✔ GGT

❤️ Heart Health

- ✔ Apolipoprotein A-1
- ✔ Apolipoprotein B
- ✔ Lipoprotein(a)
- ✔ Homocysteine

🔥 Inflammation & Vitamins

- ✔ CRP-HS
- ✔ Sed Rate
- ✔ B12
- ✔ Folate
- ✔ Magnesium
- ✔ Iron
- ✔ TIBC

- ✔ Ferritin
- ✔ Vitamin D

WHAT'S INCLUDED

More Than Just Lab Work

Your panel includes a one-on-one visit with your provider to review every result.

🔬 Full Lab Panel

All biomarkers listed above drawn at our clinic. Results in 3-5 business days.

👨‍⚕️ Provider Review

Your provider reviews every result with you, explains what it means in plain language, and discusses next steps based on your goals.

> **📋 Fasting Required**
>
> Fast for 8-12 hours before your blood draw for accurate insulin, glucose, and lipid results. Water is fine.

WHY THESE MARKERS

What Makes This Panel Different

Most doctors skip progesterone entirely and only check estradiol at random. We test the full female hormone panel — estradiol, progesterone, free testosterone, SHBG, FSH, and LH — so we can see the complete picture. We check where you are in your cycle, whether you're approaching perimenopause, and what's actually driving your symptoms. We add advanced cardiac markers like ApoB and Lp(a) that most primary care doctors never order. Combined with a full thyroid panel, fasting insulin, inflammation markers, and a complete vitamin and mineral panel, this gives us the most thorough baseline possible to build a real plan.

Important: Individual results vary. Lab results are reviewed and interpreted by licensed providers. These tests are not intended to diagnose, treat, cure, or prevent any disease without clinical context.
