

ESSENTIAL PANEL.

\$350 • 55–57 BIOMARKERS • HORMONES, THYROID, METABOLIC, VITAMINS

Our foundational panel goes well beyond standard annual bloodwork. It covers hormones, thyroid, metabolic health, and key vitamins so your provider can see the full baseline before recommending a plan.

SHARED MARKERS (MEN & WOMEN)

- Complete Metabolic Panel (CMP)** Kidney, liver, blood sugar, electrolytes (17 markers).
- Lipid Panel** Cholesterol, HDL, LDL, triglycerides — heart-risk basics.
- CBC with Differential** Red & white cells, platelets — anemia, infection, immunity.
- Estradiol** Primary estrogen — affects fatigue, weight, reproductive health.
- HbA1c** 3-month average blood sugar — gold standard for pre-diabetes.
- Insulin, Fasting** Catches metabolic dysfunction before sugar goes off.
- SHBG** How much testosterone is actually available to your body.

SHARED MARKERS CONTINUED

- T3, Free** Active thyroid hormone — fatigue & brain fog when low.
- T4, Total** Main thyroid hormone — overall thyroid output.
- Testosterone, Free** Testosterone available for your body to use.
- Testosterone, Total** Total production — energy, libido, muscle.
- TPO Antibodies** Detects autoimmune thyroid (Hashimoto’s) early.
- TSH** First-line thyroid screening marker.
- Vitamin D, 25-OH** Immune, mood, bone, hormones — most people are low.

MEN’S PANEL ADDS

- PSA, Total** Prostate-specific antigen — prostate health screen.

WOMEN’S PANEL ADDS

- FSH** Fertility, menopause status, pituitary function.
- LH** Pairs with FSH to regulate reproductive function.
- Progesterone** Balances estrogen — mood, sleep, reproductive health.

ASK THE FRONT DESK ABOUT ORDERING THE ESSENTIAL PANEL.

ELITE PANEL.

\$750 • 78 BIOMARKERS • EVERYTHING ESSENTIAL + ADVANCED MARKERS

Includes every marker from the Essential Panel plus advanced cardiovascular, inflammation, and longevity markers. The most comprehensive panel we offer — many clinics skip these entirely.

ADDITIONAL MARKERS (MEN & WOMEN)

- Apolipoprotein A-1** Protein in HDL — higher levels protect against heart disease.
- Apolipoprotein B** Protein in LDL — better heart-risk predictor than cholesterol.
- CRP-HS (Inflammation)** High-sensitivity inflammation marker.
- Cortisol** Stress hormone — chronic high/low affects energy & sleep.
- DHEA-S** Precursor hormone declining with age — energy, mood, immunity.
- Ferritin** Iron storage — fatigue even when iron looks normal.
- Folate** B-vitamin for DNA synthesis — fatigue & heart-disease links.
- GGT** Sensitive liver enzyme — early liver/bile duct stress.
- Homocysteine** Heart-disease & stroke risk; B-vitamin status.

ADDITIONAL MARKERS CONTINUED

- IGF-1** Reflects growth hormone — metabolism, muscle, longevity.
- Iron & TIBC** Iron, binding capacity, saturation — anemia & overload.
- Lipoprotein(a)** Genetic heart-attack risk factor.
- Magnesium** Cramps, anxiety, sleep — deficiency is common.
- Sed Rate** Inflammation marker for autoimmune conditions.
- T4, Free** Unbound, active T4 — more accurate than total T4.
- Thyroglobulin Antibodies** Tested with TPO for autoimmune thyroid disease.
- Uric Acid** Gout, metabolic syndrome, kidney stones.
- Vitamin B-12** Energy, nerves, red cells — deficiency is often missed.

MEN'S ELITE ADDS

- FSH** Fertility, menopause status, pituitary function.
- LH** Pairs with FSH to regulate reproductive function.
- PSA, Free & Total** Detailed prostate screen — distinguishes cancer from benign.

WOMEN'S ELITE ADDS

- DHT** Hair loss, acne, hormone balance (women's Elite only).

ASK THE FRONT DESK ABOUT UPGRADING TO THE ELITE PANEL.

ADD-ON PANELS.

SPECIALTY TESTS • HEAVY METALS • MOLD SENSITIVITY

Add-ons can be ordered alongside any Essential or Elite blood draw. Specialty tests that go beyond routine bloodwork.

HEAVY METALS — BLOOD \$220

Whole Blood · ICP-MS/MS · 3 toxic metals

For patients with occupational exposure, water concerns, or unexplained fatigue, headaches, or cognitive issues.

Arsenic Water, rice, seafood — long-term: cancer & heart-disease risk.

Lead Old paint, pipes — cognitive decline, kidneys, hypertension.

Mercury Fish, dental amalgams — nervous system, kidneys, immunity.

No special prep — collected at your regular blood draw.

HEAVY METALS — URINE \$280

Urine · ICP-MS/MS · 21 toxic metals

Our most comprehensive toxic-metals screen. Evaluates cumulative exposure and detoxification — for environmental concerns, chelation patients, or chronic unexplained symptoms.

- | | | |
|------------|--------------|------------|
| – Aluminum | – Gadolinium | – Rubidium |
| – Arsenic | – Germanium | – Thallium |
| – Antimony | – Lead | – Thorium |
| – Barium | – Mercury | – Tin |
| – Bismuth | – Nickel | – Titanium |
| – Cadmium | – Niobium | – Tungsten |
| – Cesium | – Platinum | – Uranium |

Plus creatinine (random urine) for normalization.

Prep: Avoid seafood for 48 hours before collection. Specimen in an acid-washed or metal-free container.

MOLD PROFILE PLUS IGE \$200

Blood Draw · Immunoassay · 6 indoor molds

For patients with chronic sinus issues, unexplained respiratory symptoms, persistent fatigue, or known mold exposure.

Penicillium notatum (m1) Blue-green mold on food, wallpaper, damp walls.

Cladosporium herbarum (m2) Most common outdoor mold; thrives indoors too.

Aspergillus fumigatus (m3) Soil, compost, HVAC — can cause lung infections.

Mucor racemosus (m4) Dust, soil, decaying food — common in older buildings.

Alternaria alternata (m6) Showers, window frames — major asthma trigger.

Stemphylium botryosum (m10) Decaying plants, agricultural settings.

ASK THE FRONT DESK TO ADD ANY OF THESE TO YOUR DRAW.
