Your IV Therapy Guide

The Range IV

Everything you need to know about your custom IV infusion — what's in it, how it works, and what to expect.

Custom: 5 vitamins & minerals

Duration: 45–90 minutes

THE BASICS

Why IV Therapy?

IV therapy delivers vitamins, minerals, and amino acids directly into your bloodstream — bypassing your digestive system for 100% absorption.

Oral supplements lose 20–80% to digestion. IV puts everything directly where your cells can use it. The result is faster, more noticeable benefits — often within hours of your first session.

YOUR CUSTOM IV

Choose 5 Vitamins & Minerals

Our nurses review your needs before every infusion. Additional add-ons available at $35 each.

🛡️ Vitamin C

Immune support, powerful antioxidant, collagen production

⚡ B-Complex

Energy production, metabolism, nervous system support

🧠 B12

Energy, mood, nerve function, red blood cell production

💤 Magnesium

Muscle recovery, sleep quality, stress reduction

🛡️ Zinc

Immune function, skin health, wound healing

🔄 Glutathione

Master antioxidant, detoxification, anti-aging

💪 Amino Acids

Muscle repair, recovery, protein synthesis

🔥 L-Carnitine

Fat metabolism, cellular energy production

🫁 NAC

Liver support, antioxidant, respiratory health

🦴 Calcium

Bone health, muscle function, nerve signaling

✨ Biotin

Hair, skin, and nail health

☀️ Vitamin D3

Immune function, mood, bone health

Simple, Transparent Pricing

THE RANGE IV

$225

5 vitamins and minerals included. Additional add-ons: +$35 each. 45–90 minute session.

Why IV Instead of Oral?

100% absorption vs 20–80% with pills. Rapid results — feel effects within hours. Higher therapeutic doses possible. Customized to your specific needs.

INSTRUCTIONS

What to Know Before Your Session

1. **Hydrate**
   Drink plenty of water before your session. Being well-hydrated makes IV placement easier and improves absorption.

2. **Wear Comfortable Clothing**
   Choose clothing with easy arm access. Short sleeves or sleeves that roll up easily work best.

3. **Relax**
   Sessions are 45–90 minutes. You can relax, read, work on your laptop, or watch something. We have comfortable chairs and a calm environment.

4

After Your Session

Continue hydrating. You can return to normal activities immediately. Many patients feel the effects within hours.

TIMELINE

What to Expect

Many patients feel the effects within hours. For ongoing wellness, consistent sessions provide cumulative benefit.

During Session

Mild warmth or coolness at the IV site is normal. Some notice a vitamin taste — this is expected and harmless.

Same Day

Energy, hydration, and immune benefits are often immediate. Many patients feel noticeably better within hours.

Weekly Sessions

Consistent weekly or bi-weekly sessions provide cumulative benefits for energy, recovery, and immune support.

Ongoing

Regular IV therapy keeps your nutrient levels optimized. Your body has what it needs to perform and recover at its best.

SAFETY

Important Safety Information

Tell Your Nurse If You Have:

- ✕ Any known allergies
- ✕ Kidney disease or kidney problems
- ✕ Heart conditions
- ✕ Are pregnant or breastfeeding

✕ Are taking blood thinners

Possible Side Effects:

- Coolness or warmth at IV site
- Slight bruising at insertion point
- Temporary vitamin taste in mouth
- Mild flushing (magnesium)
- Allergic reactions are rare

IV therapy is safe when administered by licensed providers. Inform your nurse of any discomfort during the session.

Important: Individual results vary. These treatments are not FDA-approved to diagnose, treat, cure, or prevent any disease.
