Your Red Light Therapy Guide

Red Light Therapy

Everything you need to know about red light therapy — how it works, what a session is like, and what to expect.

Wavelengths: 660nm + 850nm

Session: 20 minutes

THE BASICS

What Is Red Light Therapy?

Red light therapy (photobiomodulation) uses specific wavelengths of red (660nm) and near-infrared (850nm) light to penetrate your skin and reach your cells.

This light boosts mitochondrial function — the energy factories inside every cell — increasing ATP production and supporting repair. Our INNER-Light LED Bed features thousands of medical-grade LEDs on both top and bottom panels for full-body treatment in a single 20-minute session.

SESSIONS

Sessions & Packs

Start with a single session or save with a pack.

BEST VALUE

5-PACK

$375

$75/session. Start building consistent benefits.

SINGLE SESSION

$85

20-minute full-body treatment. Try RLT or use as a one-off session.

10-PACK

$600

$60/session. Best pack value for committed protocols.

MEMBERSHIP

Red Light Reset Membership

3-month minimum, then month-to-month.

MEMBERSHIP

$399/mo

Up to 12 sessions per month. Additional sessions: $50 each. Best for patients who want consistent, ongoing results.

INSTRUCTIONS

What to Know Before Your Session

1. **Expose Your Skin**
   Wear as little as comfortable — more skin exposure means better results. Red and near-infrared light can't penetrate clothing.

2. **Protective Goggles**
   We provide protective goggles for your eyes. Wear them during the entire session.

3. **20 Minutes Total**
   10 minutes per side — you flip halfway through. Your nurse or provider will help you select the right Nogier Frequency based on your goals.

4. **No Special Prep**
   No fasting or special preparation needed. Come as you are — the session is comfortable and relaxing.

TIMELINE

What to Expect

Best results with 2-3 sessions per week consistently.

First Session

Some notice improved energy and mood immediately. The light feels warm but comfortable — no UV exposure.

Week 2–4

Reduced inflammation, improved recovery between workouts, better sleep quality.

Month 1–3

Skin improvements, sustained energy, reduced joint pain. Collagen production increases with consistent sessions.

Ongoing

Sustained benefits with regular sessions. Safe for daily use — your cells continue to benefit from consistent light therapy.

SAFETY

Important Safety Information

Important Considerations:

- ✕ Not recommended over active cancerous lesions
- ✕ Use caution with photosensitivity medications
- ✕ Always wear protective goggles during sessions

Possible Side Effects:

- Mild warmth or tingling (normal)
- Temporary skin redness (resolves quickly)
- Mild energizing effect

Non-invasive with no known significant side effects. Protective goggles provided. Safe for daily use.

Important: Individual results vary. These treatments are not FDA-approved to diagnose, treat, cure, or prevent any disease.
